Technical sheet

TRANSPORT / DELIVERY

- 1 box (euro pallet) W.800 / L.1200 / H. 900 mm = 480 kg
- 1 box W.1500 / L.2100 / H.1750mm = 800 Kg
- Size of access: min. 160cm
- The boxes must be directly delivered on stage, they can not be stored outside.

INSTALLATION

Duration of assembling: 5 hours
Duration of dismantling: 3 hours

Manpower

To be provided by the organiser:

Installation of the machine:

- 1 persons during 2 hours

Installation of lights:

- 1 persons during 3 hours

Dismantling of the machine:

- 1 persons during 2 hours

During the exhibition, for security reasons, a watchman or guardian must be present at all times.

Sculpture

Surface of the installation : circle of 10 m diameter

Surface of security : circle of 11 m diameter

The installation is not made to be exhibited outside, however this is possible for short periods and dry weather only.

For the hydraulic pump and the driving gear, a separate, acoustically insulated room should be available, at a maximum of 25 meters from the central axis of the structure.

The weight of the sculpture is approximately 1000 Kg. Means to transport to the exhibition site should be foreseen. For example a goods lift.

Equipment to be provided by the organiser:

2 electric plugs 230V ~ 16 A (Power of the installation : 1.0 kW).

2-3 projectors (2000 W) to light up the installation.
